

Day Care Fire Safety Program:

Statistically, children under the age of five are at the greatest risk of injury and death from fire and that is why educating this age group is so important. Our daycare fire safety program includes lessons on matches and lighter safety, an exercise on “don’t touch hot things”, instruction on how to crawl low in smoke and how and when to “stop, drop, and roll”. Since many children are frightened by the sight of a firefighter in bunker gear, we explain what bunker gear is and how it is used. Other lessons may also be included as the program can be tailored to fit almost any age group.
