

The Hudson Bend Safety Squad is a safety program we have developed especially for the elementary schools in our fire district that began in October 2005. The Squad consists of a talented, high-energy group of firefighters with a passion for teaching children about fire safety. The Squad has created productions in each of the last three school years. The program is designed for all elementary grade levels. A new production is created each school year. The 2007-08 school year program title is "Sometimes Island" in which various safety topics will be presented.
